\* Cases identified by date of diagnosis. Numbers for AIDS may fluctuate based on new information.

\*\* Cases identified by date of report. Numbers for HIV may fluctuate based on new information.

\*\*\* The number of cases reflects both confirmed and probable cases.

\*\*\*\* The numbers of cases were provided by the STD Control Section. These are not the final numbers for 2007. Corrections will be posted as soon as all lab work on 2007 potential cases has been completed.

For questions/additional information on these or other morbidities, please call Epidemiology at 444-7214.
